

Miniature Current Transformers

Primary Single-Turn (LB) Series

The series of LB Miniature current transformers are designed specifically for integration into products which require exceptionally accurate primary signal transformation while exposed to harsh environmental operating conditions. An internal precision resistor across the secondary winding of the CT provides a low safe voltage output. It can save time and the installation costs.

◆ Features

- Primary Single-Turn
- Wide inner window, allowing clamping of big cables or bus-bars
- Wide range of sizes to accommodate all the existing installations

◆ Applications

- Current measurement, monitoring and protection for electrical wiring and equipment.
- Instrumentation, Current and power measurement for electric motors, lighting, air compressor, heating and ventilation system, air-condition equipment and automation – control system.
- Current, power and energy monitoring device.
- Relay protection device.
